

THE ECONOMIC IMPACT OF Jacksonville International Airport (JAX)

Aviation's Benefit for Florida

Florida's economic well-being is intrinsically entwined with its vibrant airport system and its robust aviation industry. The aviation system in Florida allows the state to capitalize on an increasingly global marketplace. Aviation in Florida both sustains and leads economic growth and development. Airports in Florida are important economic engines, and support vital health, welfare, emergency, and safety-related services.

Florida's system of commercial service and general aviation airports are important to businesses throughout the state. Air travel is essential to tourism, Florida's number one industry. Protecting and investing in airports throughout Florida will support the aviation industry and the economic benefits described in this report. With continued support, Florida's dynamic aviation system will continue to provide a significant economic return in the years to come.

Florida's Statewide Benefits from Aviation

Florida realizes significant annual economic benefits from aviation. The Florida Department of Transportation completed a comprehensive economic impact analysis to measure these benefits. Benefits measured in the FDOT study considered direct and indirect economic impacts and induced impacts that result from the multiplier effect. A summary of Florida's annual economic benefits from aviation follows:

Impact Category	Total Employment	Total Payroll (BILLIONS)	Total Output (BILLIONS)
AIRPORTS			
VISITORS ARRIVING BY AIR	170,107	\$8.1	\$36.3
CONSTRUCTION AT AIRPORTS	765,225	\$20.7	\$67.2
MILITARY AVIATION	17,388	\$0.6	\$2.2
AIR CARGO	137,482	\$6.4	\$12.8
AVIATION EDUCATION	129,587	\$5.0	\$10.3
AVIATION BUSINESSES	11,891	\$0.5	\$1.0
FEDERAL AVIATION ADMINISTRATION	76,217	\$2.8	\$13.6
TOTAL ANNUAL ECONOMIC BENEFITS	4,534	\$0.4	\$0.6
	1,312,431	\$44.5	\$144.0

Jacksonville International Airport

Jacksonville International Airport is located in Duval County in northeast Florida. The airport has two active runways; the longest runway is 10,000 feet. Facilities at the airport are capable of supporting a full range of commercial aircraft. The Florida Air National Guard is based at the airport; this unit flies the F-15 fighter jet.

Jacksonville International Airport serves a mix of personal, leisure, and business-related travel. Approximately 2.5 million enplaning commercial passengers flow through the airport each year; nearly 52 percent of these enplanements are visitors whose spending helps to contribute to the airport and surrounding region's economic impact. Jacksonville International has easy access from Interstate 95 and its proximity to this major interstate is important to supporting air cargo activity at the airport.

The airport has approximately 60 on-site aviation-related tenants that contribute to its annual economic impact. Most of these are dedicated to supporting the airlines and commercial passenger travel. The annual economic impact of Jacksonville International Airport is associated with direct impacts that come from tenants/businesses located at the airport and on-airport construction projects. Indirect impacts are associated with spending from visitors who arrive in the area via commercial and general aviation aircraft.
